TECHNICAL DATA

MPH Marine Transmission Oil

MPH is a multi-functional power transmission fluid, which satisfies the requirements of most major marine equipment manufacturers.

Features

Suitable for use in marine power trim units and hydraulic steering applications

Can be used wherever an ATF DII fluid is recommended

Highly resistant to wear, oxidation, corrosion and foaming

Low pour point ensures outstanding response in even the lowest temperatures

MPH meets the requirements of the following specifications.

GM Dexron II

Typical Physical Characteristics

Density @ 15 C	0.871
Viscosity @ 40 C	39.6 cSt
Viscosity @ 100 C	7.6 cSt
Viscosity Index	163
Appearance	Clear red liquid
Product Code	06011

Rev:C/10
