

TECHNICAL DATA

Super Marine Inhibitor

Super Marine Inhibitor consists of a light mineral oil blended with sophisticated corrosion inhibitors and oxidation stabilisers.

Features

Produces a soft oily film which coats unexposed internal surfaces

Principle use is in marine 2-Stroke and 4-Stroke engines, where it is applied directly into the bell mouth of the carburettor

It may also be used on external surfaces where it yields a water repellent lubricated surface which is also prevents rust formation

Ideal for other applications, such as in the preparation of two and four stroke engines for storage

Typical Physical Characteristics

Density @ 15 C	0.879
Viscosity @ 40 C	13.0 cSt
Appearance	Brown liquid
Product Code	09090

Rev:1/04
